Dear LINDSEY,

I was excited to learn of your upcoming retreat with **Lindsey Facilitator**. As a physician and a facilitator, I have a tremendous amount of respect for your willingness to participate in this form of healing. The fact that you are reading this speaks to your facilitator's commitment to creating a safe and supportive experience for you. A critical aspect of that commitment is your facilitator's request that you complete a **Health History Screening** before attending.

At **Sit Safe**, we believe that transformative experiences should be supported by a foundation of safety, respect, and medical preparedness. Our platform is designed to identify any medical issues that might impact your upcoming experience and provide insights on how those issues might be addressed, thereby allowing you to focus on your journey with peace of mind.
