

Sit  Safe

What is Sit Safe?

Plant medicine facilitators have the responsibility to screen their participants for health risks.

To facilitators SIT SAFE offers a simple, **one-click solution to outsource this medical burden**: You send a link, receive results, and ensure your participants are screened for potential risks.

If participants enter a plant medicine experience unprepared and unscreened, they face serious health risks from potentially harmful pharmaceutical interactions.

SIT SAFE allows facilitators to avoid the risks tied to modern pharmaceuticals with plant medicine, avoiding spending hours researching medications—often without feeling fully confident in the results.

Medication interactions pose the greatest risk to guest safety, but certain medical conditions can also be a concern. SIT SAFE addresses both.

SIT SAFE is physician-founded and led, with a team of medical experts who evaluate each participant.

In a nutshell, SIT SAFE provides a streamlined health and safety evaluation tool for facilitators to screen their participants before joining an plant medicine experience, delivering clear, detailed results that highlight any potential issues.

What is the value of working with Sit Safe?

A Modern Solution to a Modern Problem

Plant Medicine's thousands of years of indigenous practice never required rigorous screening.

While traditional practitioners focused on diet and preparation, modern challenges like pharmaceutical interactions (e.g., antidepressants, blood pressure medications) didn't exist.

SIT SAFE addresses these new risks, ensuring participants are screened and prepared for safe experiences.

Access to Medical Expertise Without the Overhead

Don't have an MD on staff? With SIT SAFE, you get access to one at a fraction of the cost.

Already have an MD? We streamline their workflow, reduce their workload, and lower your expenses.

Enhanced Safety and Peace of Mind

Provides highly accurate evaluations, increasing participant safety.

Offers confidence that the highest level of care has been delivered to your guests.

Mitigates risks by adding a critical layer of protection to your practice.

Elevated Professionalism and Credibility

Certification by PsychedelicMD enhances your credibility in the psychedelic space.

Demonstrates that your business meets or exceeds the industry standard of care.

Strengthens your reputation with guests and serves as a powerful marketing tool.

Streamlined Operations for Facilitators and Retreat Centers

Outsourcing the medical burden allows you to focus on what you do best.

Saves time and stress by simplifying the evaluation process.

Delivers financial ROI, particularly for larger retreat centers managing high volumes.

What makes Sit Safe so unique?

Led by an MD with Decades of Experience in Medicine and Plant Medicine

SIT SAFE is led by Dr. Randall Evans, a physician with over 35 years of experience as an MD and more than 10 years of expertise working with plant medicine.

This unique combination ensures evaluations are both medically thorough and practically relevant for plant medicine facilitators.

The Most Accurate Screening Available

SIT SAFE has a strategic partnership with the industry's leader in tracking pharmaceutical interactions to deliver reliable, precise evaluations for every medication.

This ensures participants are screened for the complex risks of combining Plant Medicine with any pharmaceuticals.

Detailed Reports That Highlight Risks and Next Steps

Each participant receives a detailed report that highlights any issues and provides clear guidance.

Facilitators can easily decide how to proceed—whether it's postponing a participant due to insufficient time to stop a contraindicated drug or confirming that their medications pose no risks.

Results in 48 Hours for Professionals

All evaluations are physician-reviewed and delivered within 48 hours, allowing facilitators to handle last-minute sign-ups stress-free.

Affordable for Facilitators of Any Size

SIT SAFE makes medical support accessible to all, from small facilitators to large retreat centers.

For many, this is the first time such a service has been within reach, enabling safer, more professional experiences for participants.
